Work Experience

Antino Labs
Software Developer

Aug 2022 - Oct 2023
Gurugram, India

Antino Labs is Service Based Company, offering end-to-end technological solutions. We excel in web development, covering UI UX, frontend, backend, and scalable deployment.

AlmaBetter ↗

- Created a CMS for an online learning platform enabling clients to manage digital content, including course creation, chapter organization, and assessments.
- Integrated a Rich Text Editor with multimedia upload for formatting.
- Addressed critical bugs, refactored code, and established reusable components and a scalable folder structure.
- Implemented various features such as form fields, search, sort, validation, pagination, notifications, and breadcrumbs.

DevLabs ↗

- DevLabs is an Ed Tech platform that offers educational courses, along with training and consultancy services.
- Created responsive UI layouts for over 50+ screens within the Web App, incorporating elements such as charts, tables, and forms.
- Integrated the Razor Pay Gateway and REST APIs into the admin dashboard, enabling efficient management of user profiles, payments, and various features, including notifications, feedback, webinars, quizzes, and more.
- Collaborated with clients, designers, and the team, for animations and enhanced user experience.

InnerScore ↗

- Led the development of the InnerScore website, a platform that enables teachers and students to share resources and collaborate.
- I was responsible for developing the website's UI, integrated it with the Backend data management system, and achieved responsive design for web, tablet, and mobile views using SCSS.
- Integrated REST APIs, and Intigrated Email JS with SMTP for automated email notifications and designed Figma mail templates.
- Achieved a 60% website performance improvement, better SEO, and Lighthouse Score.

Projects

Aiko store ↗
Next.js • Tailwind

Teerific customizer ↗
Three.js • Framer Motion

Dona clone ↗
